

# Strengthen your Revenue Cycle with Expert Support and Innovative Technology

Nextgen Enterprise Financial Suite helps you maximize performance

To achieve optimal financial results for your practice, you need both advanced technology and professional support. With NextGen® Enterprise Financial Suite, you receive a combination of specialty-based support, managed services, and technology—all to reduce administrative burden on your practice.

## Specialty-based professional guidance

You get the support of experts dedicated to your practice specialty. Our client management team provides revenue-cycle expertise to guide best-practice business decision-making. You'll be assigned a client manager and specialty director to help you:

- Understand and improve your financial performance
- Stay a step ahead of payer reimbursement rules and changes
- Resolve specialty-specific issues and meet your business goals

## Managed Services to support business operations

NextGen Enterprise Financial Suite complements your current investments in technology and in your team. Reduce the administrative burden on your staff and allow them to focus on higher value tasks.

We work with you to maximize operational efficiency, optimize reimbursement, and achieve full regulatory compliance. You'll benefit from:

- Claims management
- Payment posting
- Paper-to-electronic EOB conversion
- Monthly performance reporting
- Optimization of your practice management solution

## Technology to drive intelligence and automation

You'll get access to additional technology to enhance your current practice management solution, including insurance and demographic verification, charge review and claims editing, clearinghouse services, and financial analytics and reporting.

Patient access tools will help you register the patient more accurately and pinpoint the right insurance plan. To improve claims accuracy and prevent denials, the NextGen® Charge Review Rules Engine reviews 100% of charges before claims are created, significantly reducing need for manual review and freeing up staff time.

You'll get access to data and insights from NextGen® Financial Analytics. Use these insights to increase efficiency and improve financial results. Take tedious, time-consuming tasks off your plate and gain more freedom to focus on patient care.

“We achieved an almost 50% reduction in total AR days outstanding working with NextGen Healthcare’s revenue cycle management team.”

**Dustin Frey**  
Financial Director, Heartland Health Center  
Grand Island, Nebraska
